

Development of Anderson Road Quarry Site

Pedestrian Connectivity Facilities

Consultation Digest

土木工程拓展署
Civil Engineering and
Development Department

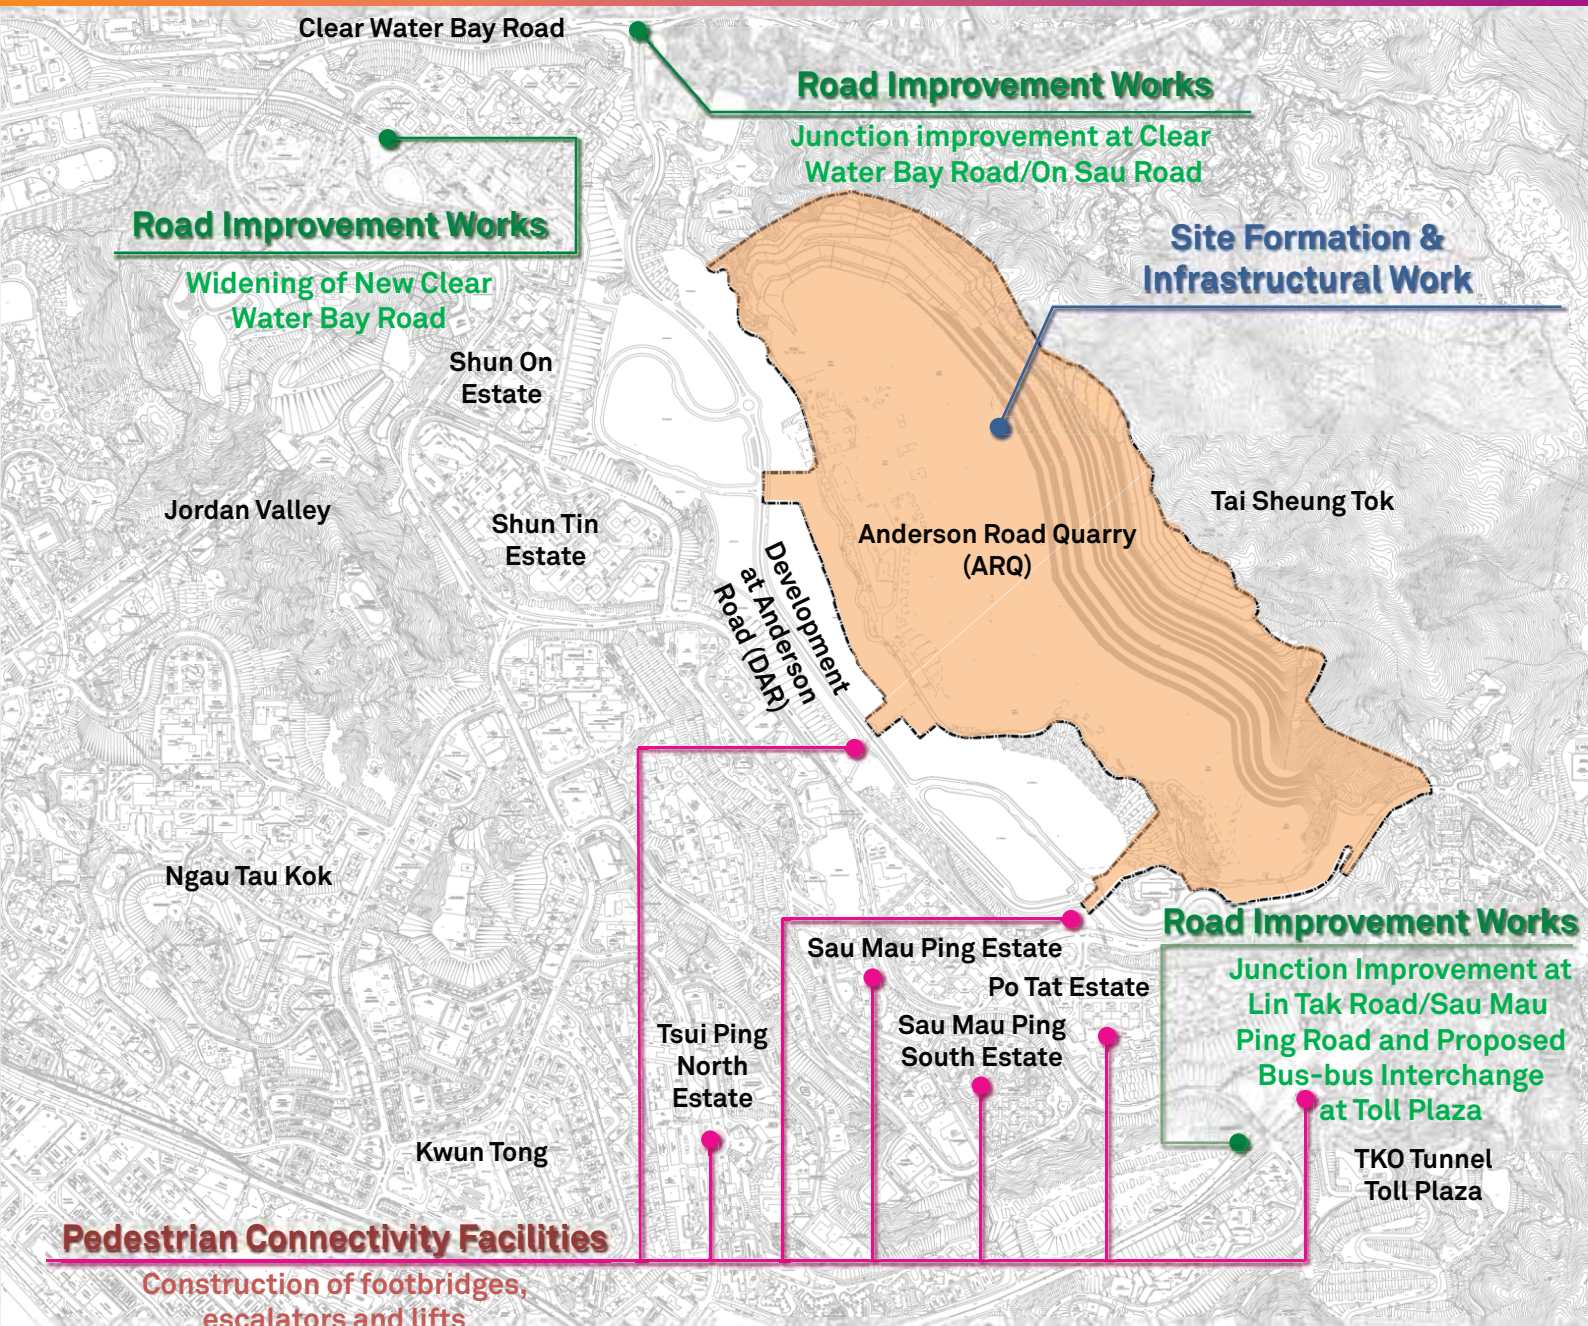

AECOM

December 2014

Project Information

Anderson Road Quarry “ARQ” is located at the southwestern ridge of Tai Sheung Tok Hill in East Kowloon. The development platform covers an area of about 40ha. It will provide land for residential housing development, commercial uses, supporting community facilities, a quarry park, open spaces and amenity areas, starting from 2019/2010.

Project Scope

Purpose of Consultation

This consultation digest aims to introduce the pedestrian connectivity facilities linking ARQ development area, those housing estates in the vicinity and Kwun Tong Town Centre.

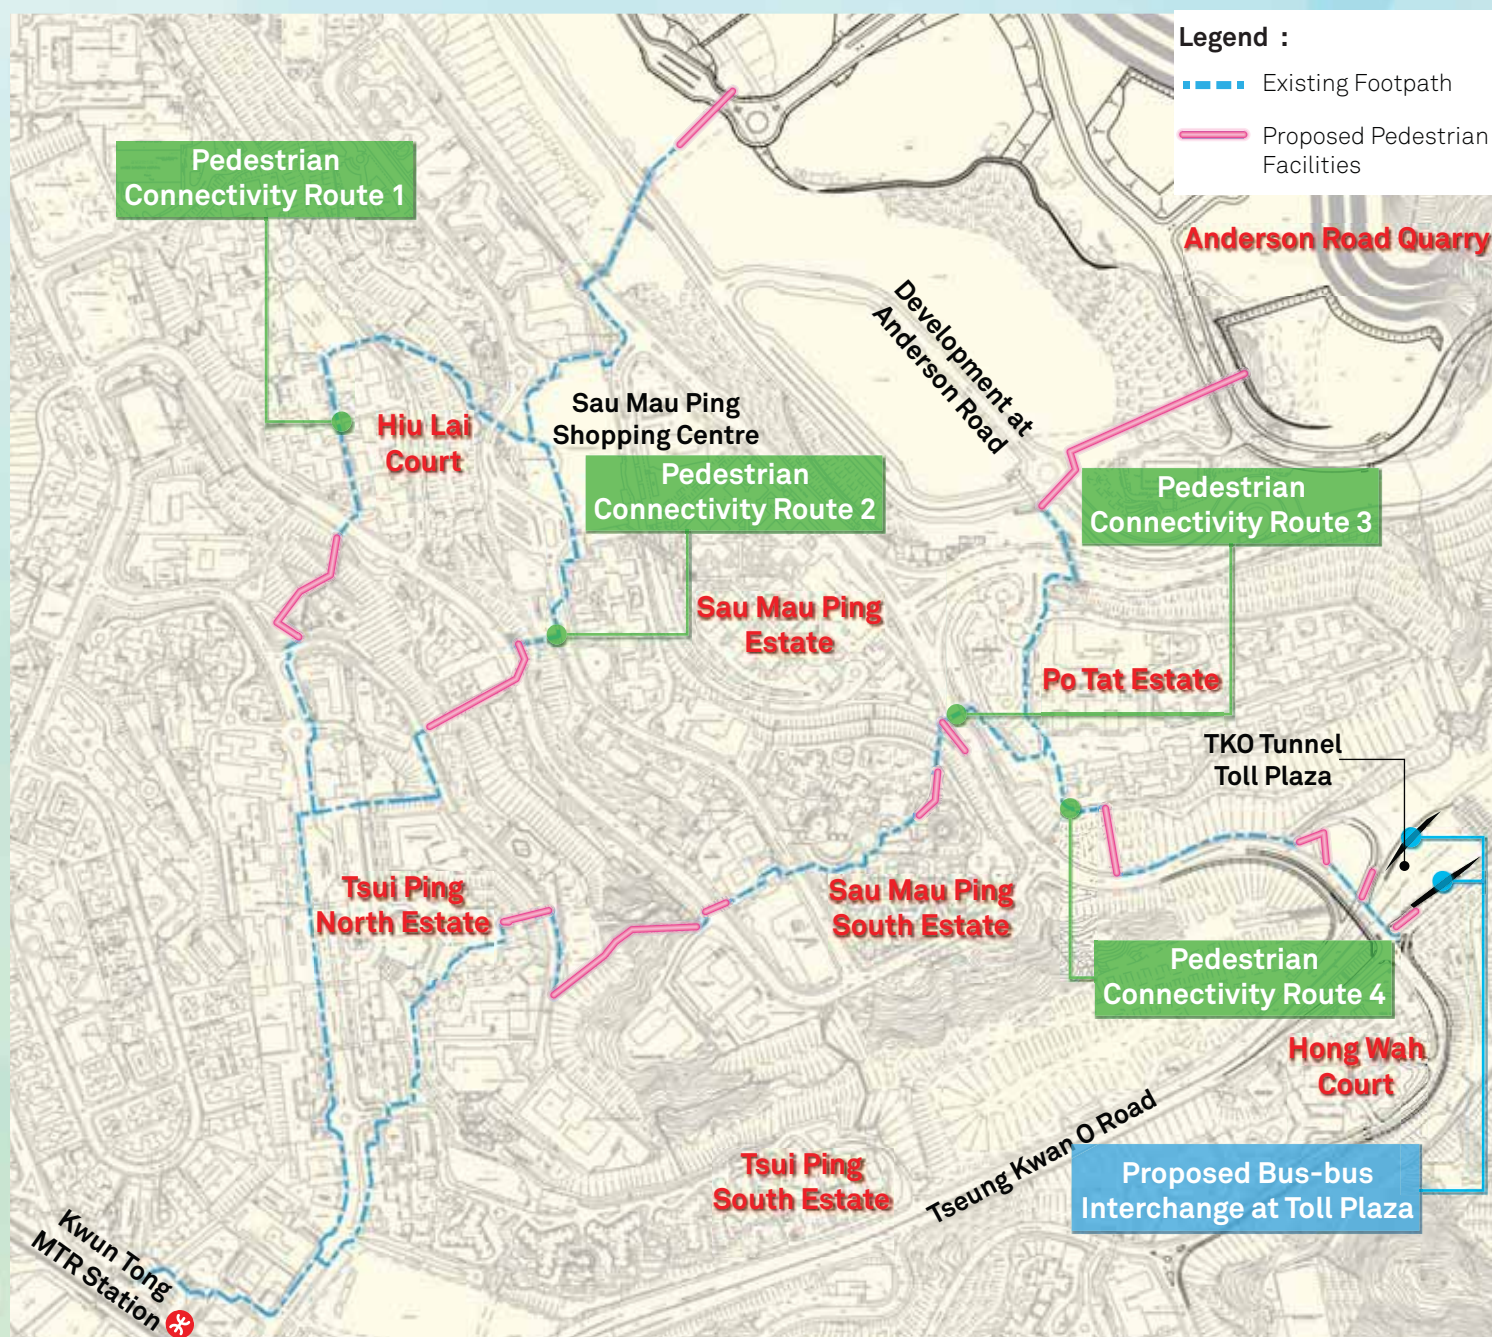

Objectives and Benefits of Pedestrian Connectivity Facilities

We target to enhance the pedestrian connectivity among ARQ Development Area, those housing estates and community services facilities in the vicinity by

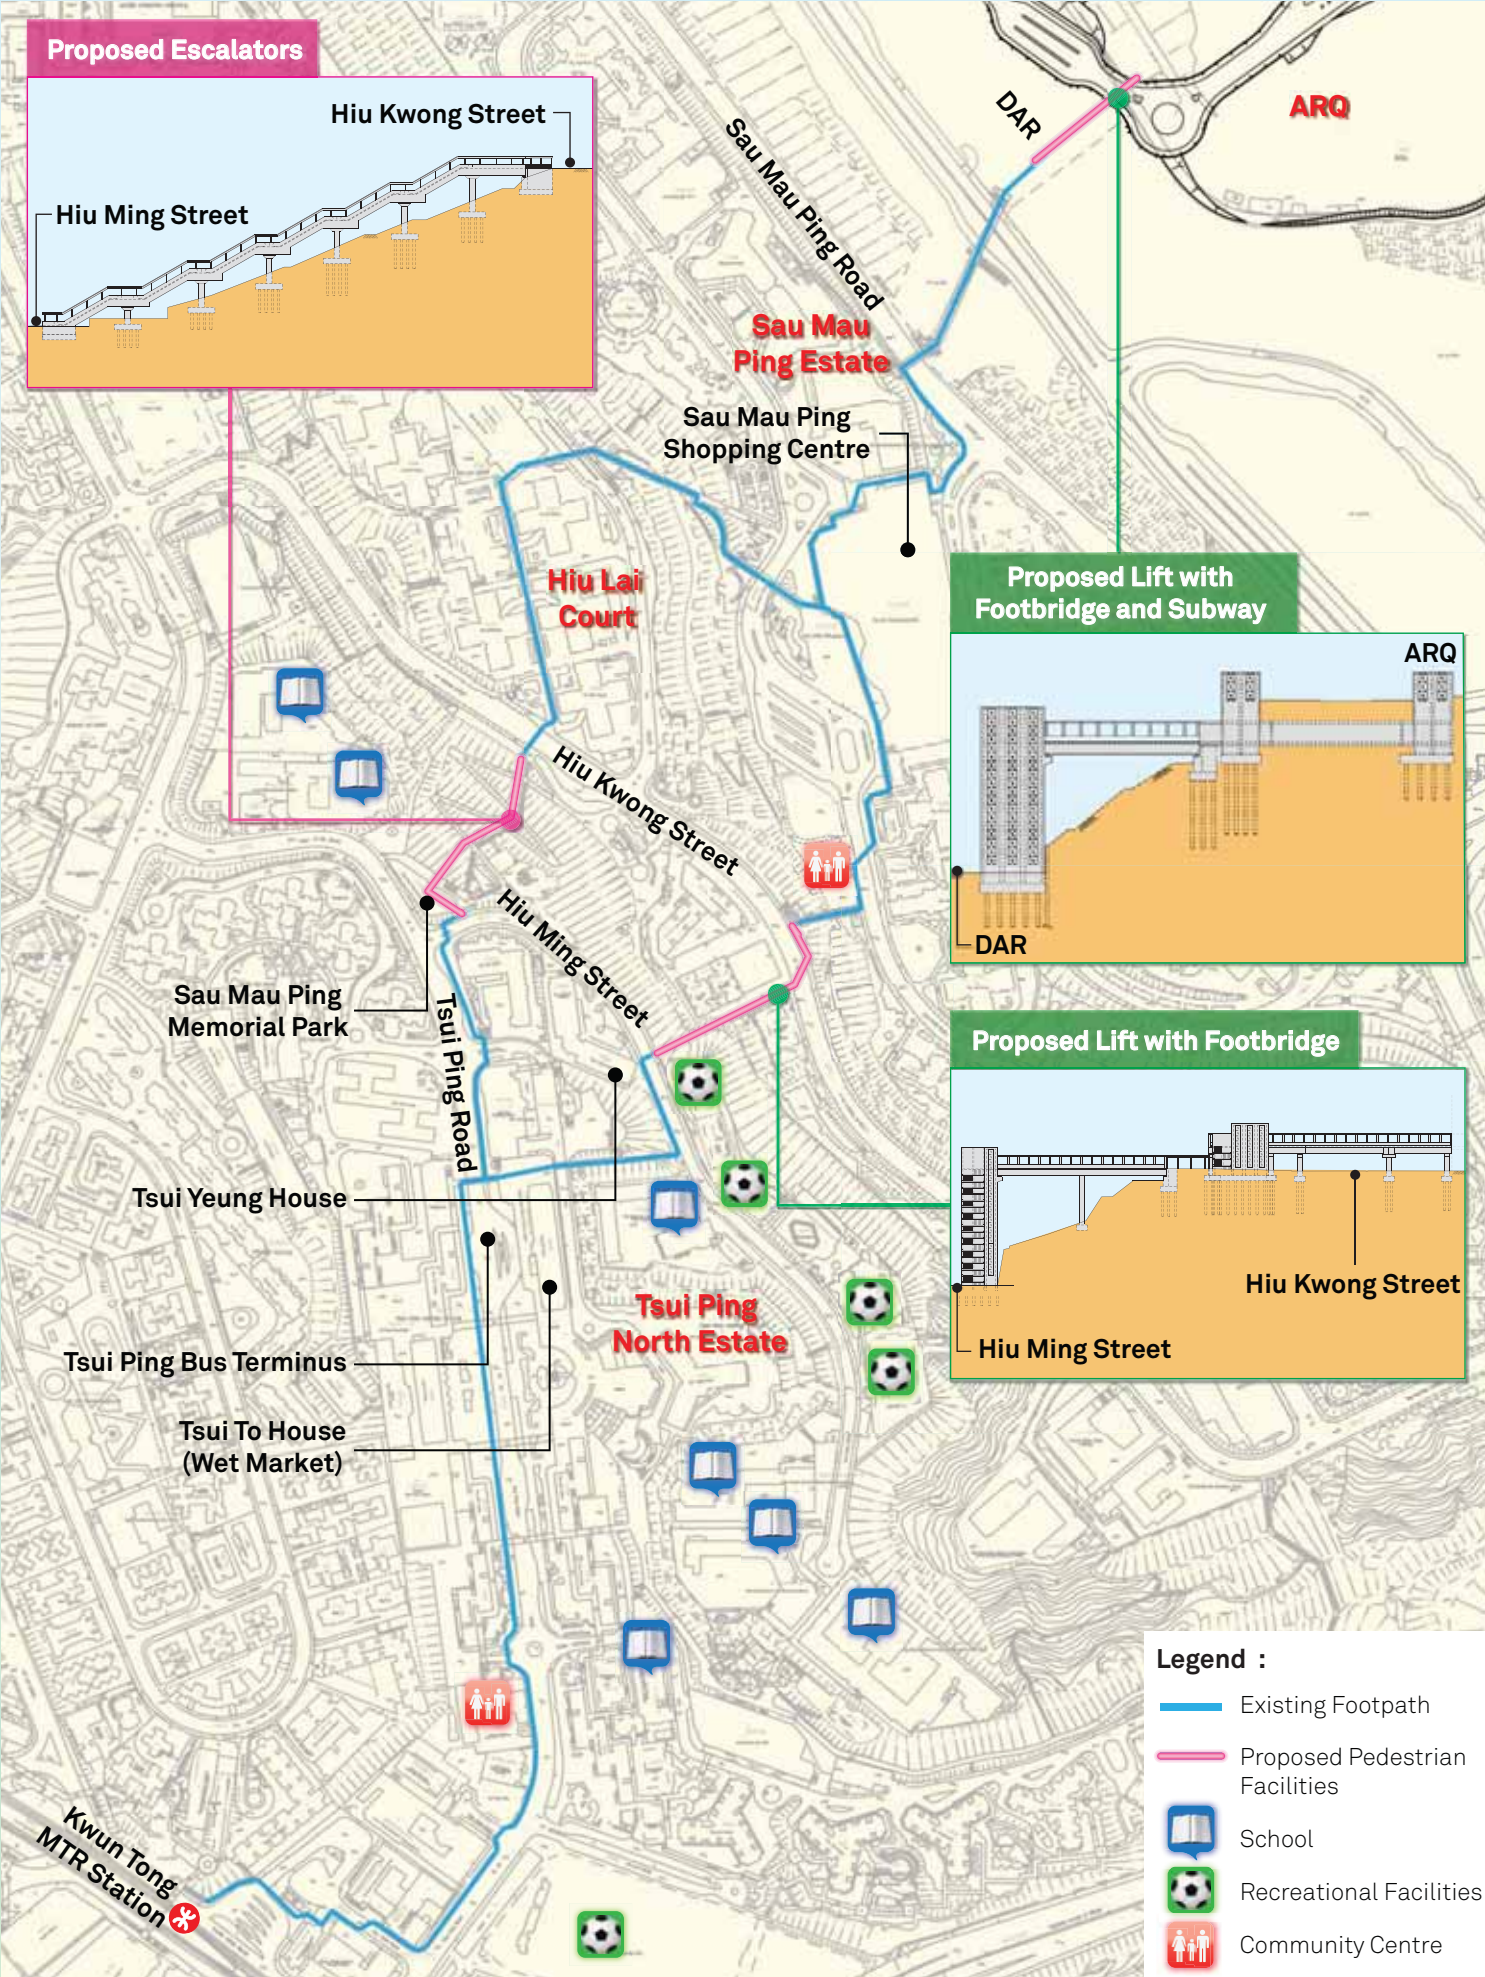

- Constructing footbridges, lifts or escalators to enable residents to travel conveniently among the ARQ Development Area, Sau Mau Ping, Kwun Tong Town Centre and Kwun Tong MTR Station;
- Connecting existing pedestrian routes in the district for the convenience of residents;
- Providing access to the bus-bus interchange station at Tseung Kwan O Tunnel Toll Plaza being proposed under this ARQ development project, and
- Aiming thereby to reduce the demand for short vehicular trips to relieve the pressure on the existing road network.

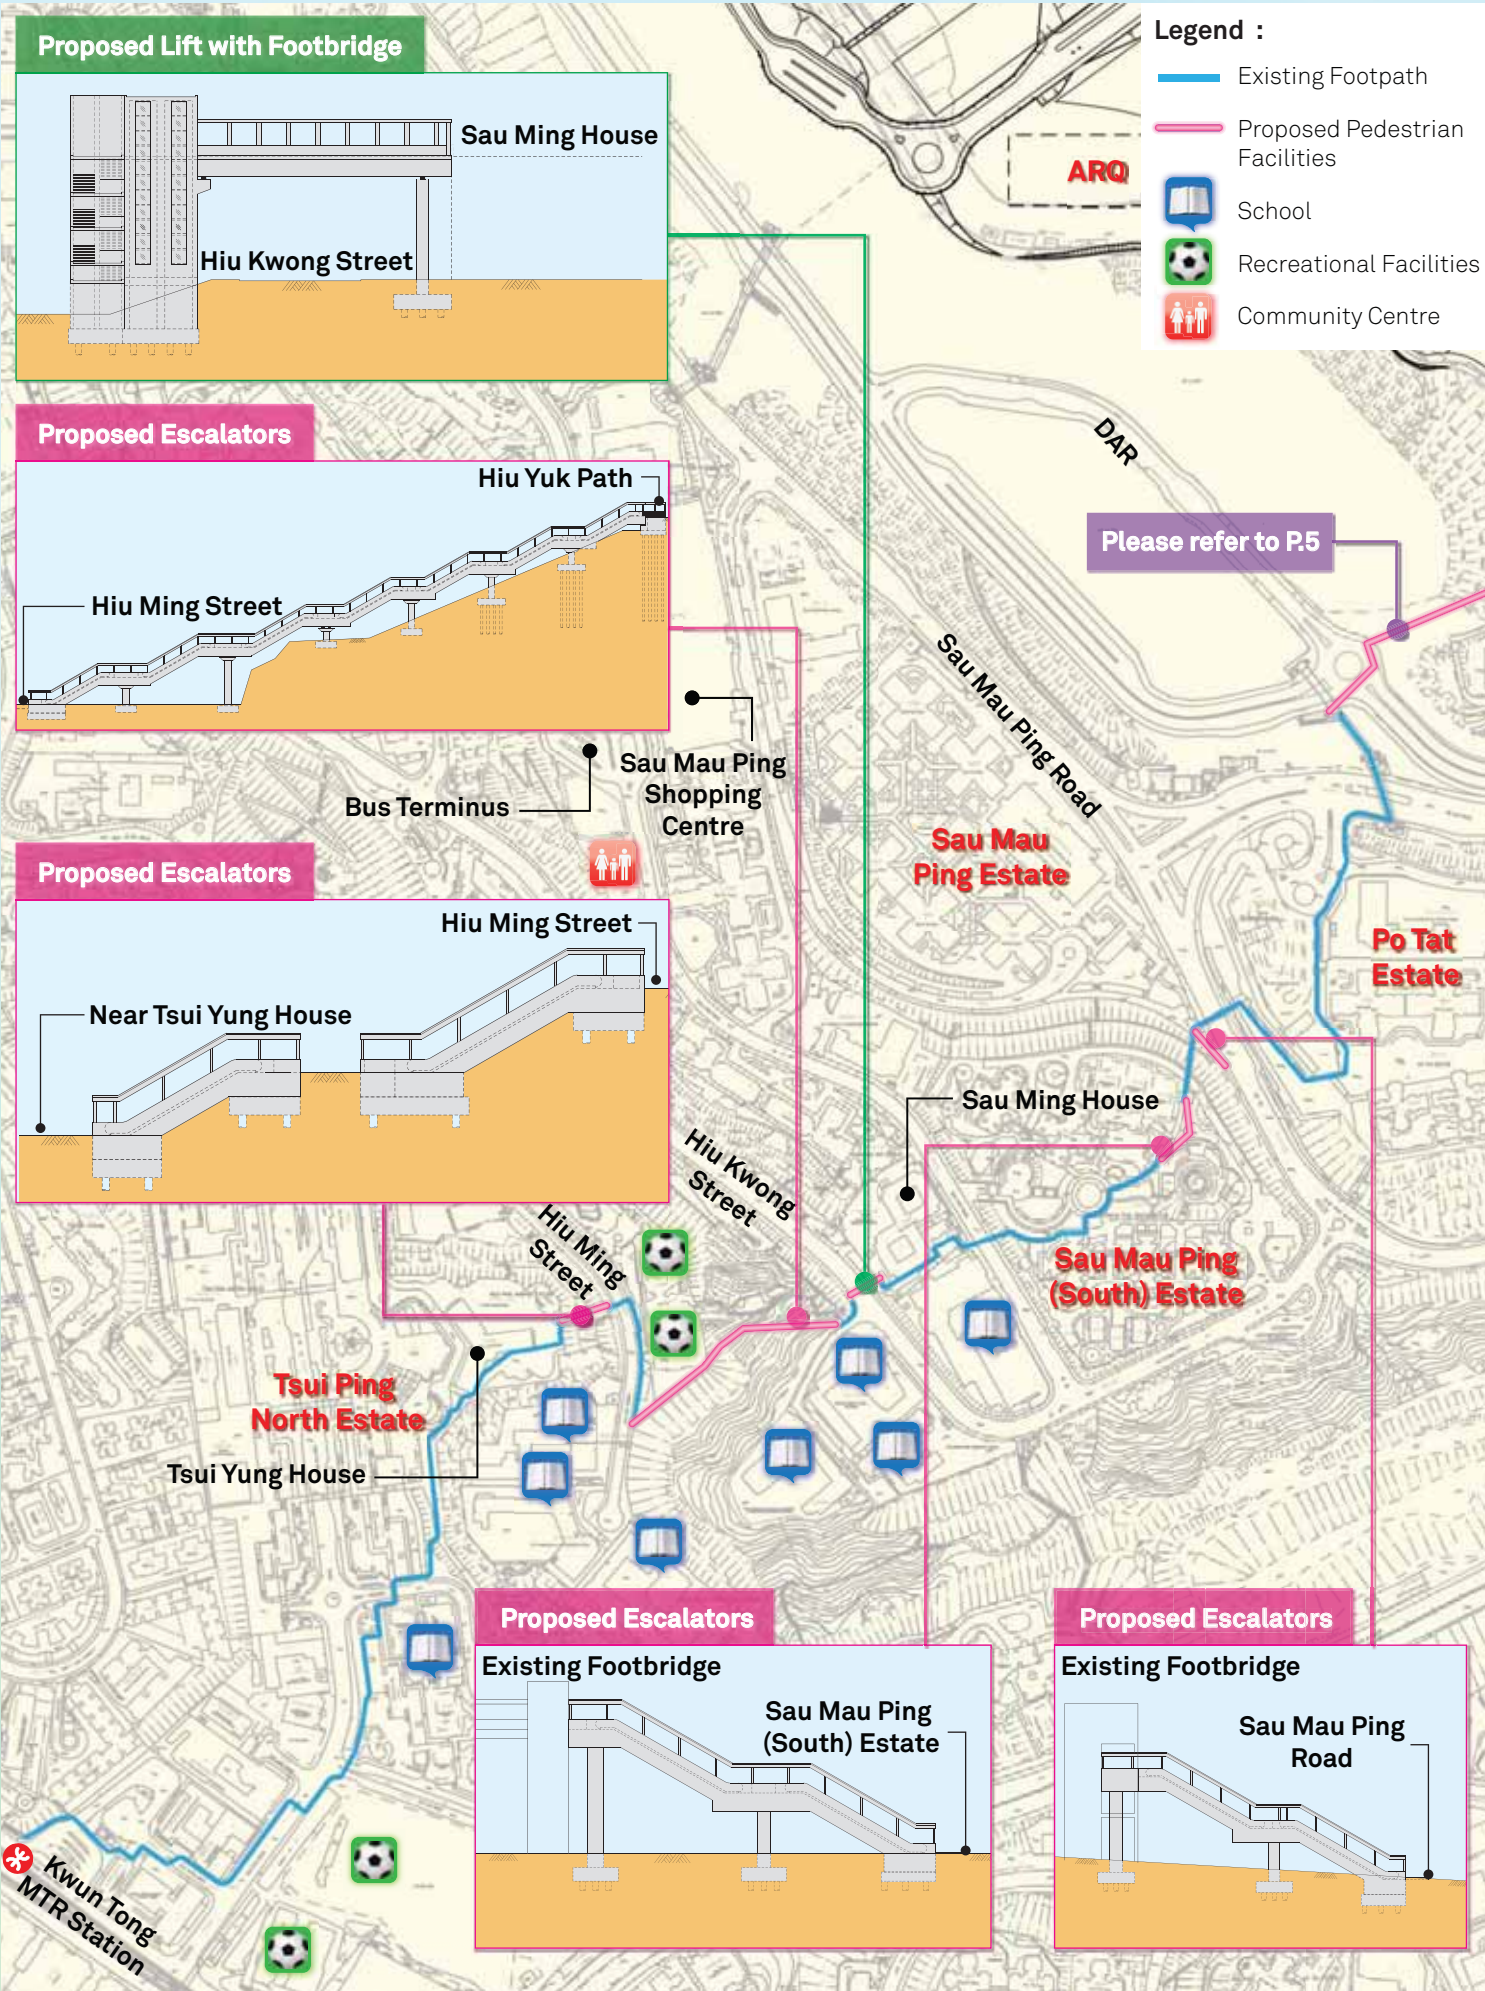

Proposed Routes for Pedestrian Connectivity

Proposed Pedestrian Connectivity Route 1 & 2

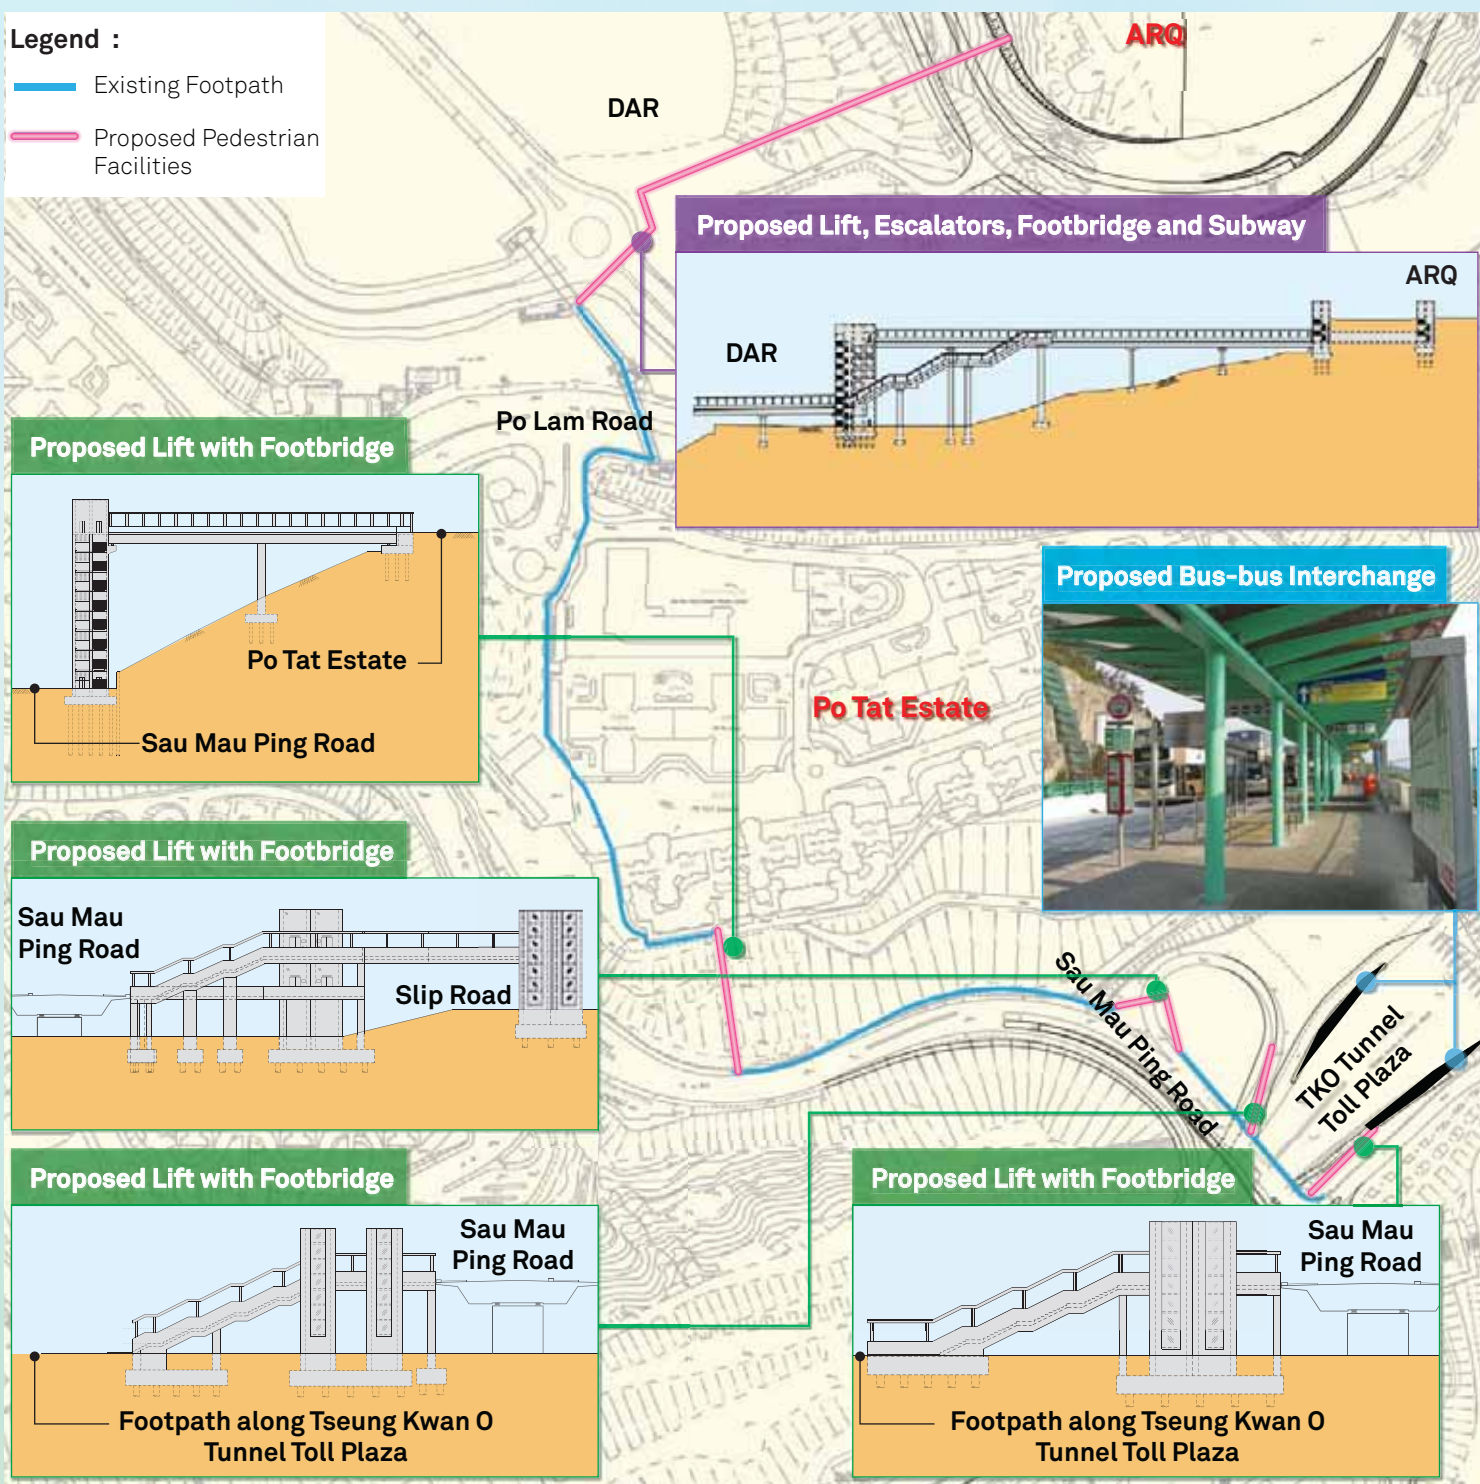

Proposed Pedestrian Connectivity Route 3

Public Consultation and Your Views

We welcome your views and suggestions on our proposed Pedestrian Connectivity Facilities for the development of ARQ in the public consultation conducted from mid-December 2014 to January 2015.

We shall undertake to refine and optimize our pedestrian connectivity design with the benefits of your views.

Please forward your written comments by 31 January 2015 to:
